

Tale of Two Cities – Multiple Choice Test

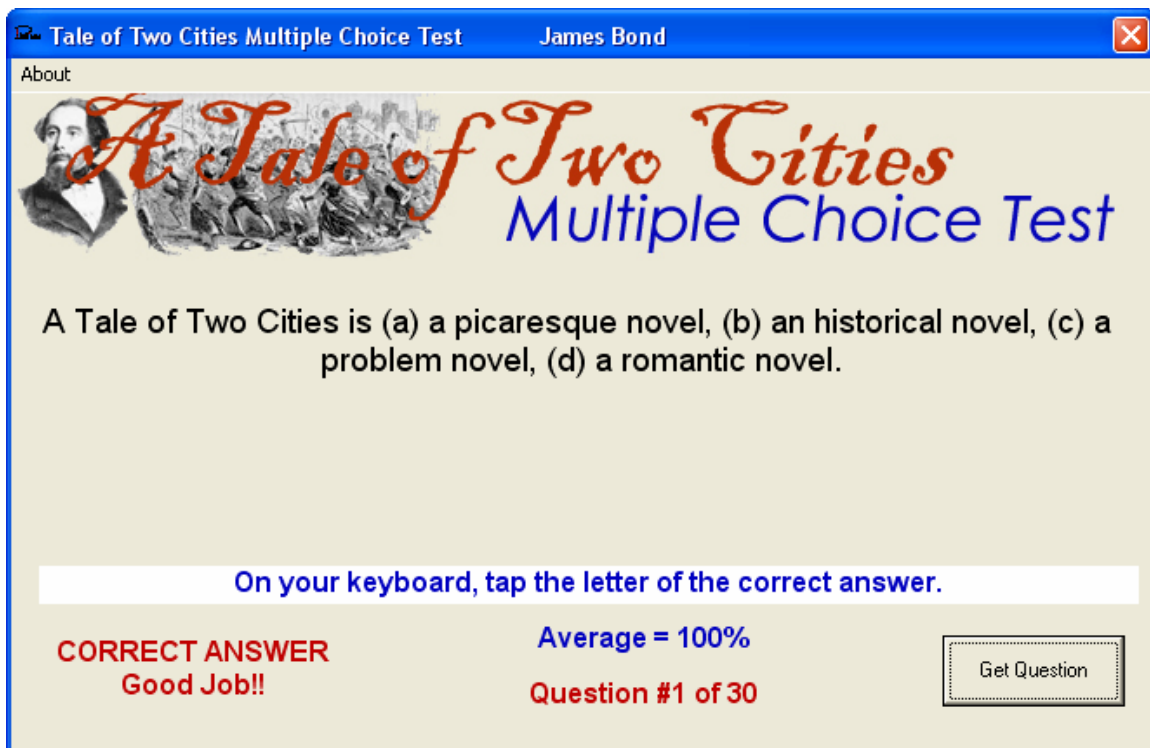

Windows PC
FreeWare from Baggetta_Ware
Version 1.0

No Guarantees or Support Offered

This is an easy-to-use Windows PC program designed to test your students' knowledge of their reading of the novel *A Tale of Two Cities*, by Charles Dickens.

Install the program on your Windows PC using the setup program that accompanies this download or CD.

Double click the icon that appears on the Windows Desktop. Student should enter his name and then click OK. He will then see a workscreen similar to the one here.

Students get the questions by clicking the Get Question button. There are 30 questions in the test. Students should read the multiple choice question that appears and then tap the A, B, C, or D key on the keyboard that corresponds to the correct answer.

When the test is over a final grade screen will appear. Teachers should record the final score, if this is used as a graded test.
